---

## Experience:

### Cognition Studio 17-Present

Currently a Web Developer focusing on bringing website designs for the biotech industry to life in Wordpress and Drupal utilizing CSS, Javascript and other front end frameworks and technologies.

### Design Commission 15-17

At this design agency, I learned how to be a true team player as part of a small, independent studio. I learned many new technologies and frameworks while part of a two person dev team. After the other developer left, I learned how to become a confident and responsible leader as the single developer in the company.

### Dominion Marine Media 12-15

As a designer/developer for this industry leading brand I was tasked with building custom websites and implementing yachtworld.com's worldwide MLS-style database of yachts. Using PHP, mySQL and creating custom wordpress themes I utilized logical, creative, problem solving to give yachtbrokers a stronger foothold in the competitive marine industry.

The experience gained from this company will stay with me throughout my career, the learning environment truly inspired me to become the best developer I can be.

### Cooke Communications 08-12

As a web designer for this Key West company, my job was to take client's ideas from concept to mockup to a fully coded site.

## Education:

### Rochester Institute of Technology

Bachelor of Fine Arts - Visual Media - 2008

## Abilities:

HTML5	LESS/Sass	GitHub
CSS3	CSS Frameworks: (Bulma, Bootstrap)	mySQL
Javascript	Web Service APIs (REST)	Linux Commands
PHP	Custom CMS Development	Adobe Creative Suite
React.js	Wordpress	Sketch
jQuery	Drupal	Web Analytics
AJAX	Responsive Design	Jira /AGILE Processes
HTML Templating (Twig)		Photography

## Ideology:

I love to learn and experience new things, whether it be new technology, sports, places or people, I believe one's education should never end. I always insist on pushing the limits of my abilities and progressing to the next level of understanding.
